

BIOSTOP[®]

CLOTH MOTH TRAP

**sticky cloth moth trap with sex pheromone
for professional and household use**

BIOSTOP[®] CLOTH MOTH TRAP was developed for monitoring the occurrence and elimination of slight infestation of the cloth-moth (*Tineola bisselliella*) in closed area.

ACTIVE INGREDIENT: Cloth-moth sex pheromone

ADVANTAGES:

- Easily applicable.
- Environmentally safe.
- The trap contains no toxic insecticide.

PHYSICAL AND CHEMICAL PROPERTIES:

Appearance: trap: printed special cardboard covered with glue
dispenser: containing traces of cloth-moth sex pheromone

Odour: odourless

Stability: stable up to 60 °C

Materials to avoid: wet conditions and materials

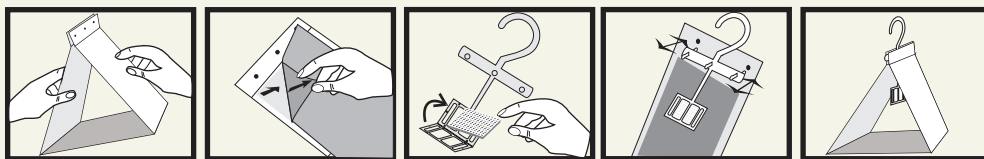

Hazardous decomposition: none

GENERAL INFORMATION:

The sex pheromone incorporated in the dispenser effectively attracts males of clothes-moth species for 6-8 weeks. The glue remains effective for a long period. This trap is not effective against warehouse moths developing in foodstuff.

DIRECTION OF USE:

- Fold the cardboard sheet to form a triangle.
- Remove the protecting foil from the adhesive side of trap.
- Open the hermetically sealed pouch and take the dispenser out. Place the dispenser to the upper part of the plastic frame then close the frame by turning its lower part up.
- Place the appropriate part of the hanger into the holes on the edge of the cardboard sheet, then fold the trap to create its final shape and fix it to the other side of the hanger.
- Hang up the trap, or place it on a shelf in the cupboard.

Place the trap in a dust-free area. Check at regular intervals. Replace the trap with a new one when full of insects, or contaminated, or functioning longer than 6-8 weeks. After use the trap can be thrown into the trash. It is recommended to use at least one trap per 1 - 2 m³ cupboard size, or 16 m² indoor space.

PACKAGING: 2 traps - 2 dispensers - 2 plastic hangers/box, 12 boxes/carton
